

Please do not change the situation of the FM stations as they are presently set up to replace them with LPFM stations. I understand the need to diversify, but in the process you may be eliminating the effectiveness and consistency of the present situation. My family listens to several nationally broadcast stations; KLOVE and NPR. We traveled across the country this summer and found them both everywhere because they were national. There are many homes, plus businesses I might add, that listen to these stations--along with the locally broadcast FM stations. These would be disrupted and not consistent depending on the station itself. These broadcasts are self-funded. MANY people have commented over the past few years how much they enjoy walking into a store or getting into a car where KLOVE is broadcast because they can be assured that their whole family can listen and be uplifted with positive upbeat music and encouraging messages. This would be disrupted and lead to a great loss to my family and this community.
